E-Bike Brochure

FANTIC

EN

**E-Bike  
Brochure**

A woman wearing a black Fantic t-shirt, black shorts, a silver helmet, and pink sunglasses is riding a Fantic e-bike on a dirt trail. The bike is black with bright yellow and red accents. She is leaning forward in a riding posture. The background shows a clear blue sky and some greenery.

**Fantic** is a brand with more than 50 years of history.

We design, engineer and assemble high-performance electric bikes, with a view to enhancing our customers' experience. We focus on **design & technology** without compromise. We are a powerful e-motion.

# Fantic philosophy

01

## Autonomy

Fantic designs its **E-Bikes** with a view to ensuring the best **performance of the battery and electric motor**. New integrated 720Wh Battery / compact 369mm 40-cell battery. **The Rosenberg magnetic connector ensures a long lifespan** even when operated under high loads. We have introduced a dedicated management system to optimize battery consumption.

02

## Handling

Fantic designs its E-bikes assuring the best performance of the battery and electric motor. The new integrated 720 Wh Battery is a compact (14.5 inch) 40 cell battery. Our E-Mtbs are engineered to have a short integrated battery (14.5in vs 15.75in of the competition) reducing the yaw inertia and lowering the center of gravity provides for an easier change of direction. **Optimized Motor & Battery layout**. Powertrain at the center of the bike enhancing weight distribution & lowering yaw inertia. A 29" wheel to safely overcome bigger obstacles and reduce gyro effect to further improve easy change of direction. **Advanced hydroforming for high stiffness of the frame**, rigid rear triangle achieved through forged cantilever, oversized bearings, single pivot configuration and oversized chain stays. FEM analyzed and optimized top bar, down bar, steering tubes, and junctions. Rigid front triangle for predictable handling.

## Exclusivity

UX Design & Engineering **made in Italy**. All **E-Bikes** (Frames, Group sets & Powertrains) fully designed, engineered & assembled in Europe (Italy & Germany). **Exclusive new 720 Wh battery designed by Fantic**. Based on over 50 years of expertise, engineering & Italian design, **Fantic** bikes provide the end-consumer with the best experience available on the market. Battery upper release. Prevents: having a dirty battery, hitting the ground when releasing it or having to place the bike upside down to remove it.

03

## Control

The rear suspension linkage features **FPS (Fantic Progression System)**, to ensure excellent grip performance on any terrain. In collaboration with **Acerbis**, our R&D department has designed and developed an **'injected composite'** rear chainstay strut. This novel technology not only allows the brace to perform and respond better and more quickly on uneven terrains compared to other materials, but also instantly gives it a new look. This innovative technology will be applied to the Trail Alu, All-Mountain, Enduro and DH segments. Our engineers carefully select the **motors we use to offer the best torque even at a low pedalling cadence** (between 60-90 pedal strokes per minute), up to a maximum torque of 120 Nm (\*). The choice of combined 29/27.5-inch wheels are the result of **Fantic's** expertise in the motorcycle industry delivering unrivaled control. (\*) In the *Issimo 45* model.

# E-MTB Light Rampage XC/DC

Preferring **long distances and extreme speeds** to unleash a load of pure adrenaline on cross country routes embodying the essence of its name: **Rampage** – the first e-mtb light by **Fantic**.

You get to choose between 2 travel range types: XC (120mm) or DC (140mm).

The innovative **Rampage**, designed with a focus on lightness by **Fantic's** R&D department, boasts a **full carbon frame** weighing just 34lbs (\*) in its high-end version.

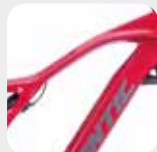

Its seamlessly integrated battery makes it easy to forget its presence.

(\*)The ebike referenced in the weight is the **Rampage 1.2 Factory**.

# E-MTB Trail

The **Trail** range includes three different models for the US market with both carbon fiber and aluminum frames, all fully suspended with 150 mm front travel

They are fitted with **Brose or Yamaha** motors in order to achieve the best possible performance.

**All Fantic frames are designed and developed in-house** by strictly applying our four design principles (handling, control, autonomy, and exclusivity) to produce high-performing and adrenaline-pumping bikes.

# E-MTB All Mountain

**MTB All Mountain** by **Fantic**,  
the keyword is **versatility!**

Designed to offer an excellent balance between downhill performance and uphill pedalling, the **All Mountain** range consists of 2 models, 1 with a carbon frame and 1 in aluminium, both fully suspended for maximum shock absorption with a 170 mm travel.

**Engineered and developed by Fantic** for those who are looking for a **high-performance and versatile bike**, and suitable for all types of trails and paths, from those with little elevation gain to more challenging descents.

# E-MTB Enduro

**E-MTB Enduro by Fantic,  
power at your service!**

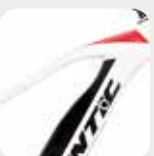

Designed for natural descents, new school trails, bike parks and aggressive slopes, the **Enduro** range includes the Race and Factory versions. The second one is characterized by **carbon seatstays**, and they are all fully suspended for maximum shock absorption with a 180 and 190 mm travel.

**Engineered and developed by Fantic** for those who are looking for an extremely high-performance bike that is agile and reliable both on steep slopes and on bumpy terrain, but also rideable and allows you to reach the top thanks to the long-life 720Wh battery.

# ISSIMO

The product range is completed with the **award-winning Issimo Urban**, which has reinvented the concept of sustainable mobility, revolutionizing commuting by making it both easier and safer. **Issimo** guarantees **safety and stability** on every terrain, thanks to its 20x4" tires and low center of gravity.

# Trekking

Fantic's engineers have designed this model to integrate our best **Italian design**, innovative lines, top level performance and all the road safety we need. **Fantic** has created a new "concept" of urban E-Bikes that is suitable for every kind of road, and is sporty and contemporary.

Riding every day, in the city and outdoor areas, without compromising on safety, quality and comfort. That's why we created the world of **Living**, one model for **everyday commuting, for everyone.**
